Assignment 3

In this assignment you will:

- Complete the work we start in class by filling in the "Assignment_3" script
- Work with vectors and type conversions
- Begin to clean messy data with code
- Make simple scatterplots and export them to files
- Subset a raw data file and save the subset to a new data file
- Build data frames from scratch using vectors

For credit . . .

1. Upload a completed version of the "Assignment_3.R" file to Canvas
2. Push that same completed file to your GitHub repository along with any generated files

---

We will be using an R script called "Assignment_3.R"

We will work through this script in class, pausing to understand what's going on at each point.

Some of the script is intentionally left blank. You will work with a partner to fill in the gaps.
